\$26,203.20 - \$39,864.00**

Department: Public Health
Location: Montgomery

TYPE OF EXAMINATION

An **open-competitive** register will be established. Qualified applicants will be evaluated based on their training and experience as shown on their application. Therefore, all sections of the application must be completed and applicants must provide a **detailed** description of their duties. This evaluation will comprise 100% of the final grade.

QUALIFICATIONS NEEDED TO APPLY

You must have all of the following to qualify:

- High school diploma or GED supplemented by special training in x-ray testing to include reading techniques and/or electrocardiograph techniques.
- Two years of experience in the operation and maintenance of x-ray and other related clinic equipment.

KIND OF WORK

This is specialized technical and supervisory work in x-ray programs across the state. Work at this level differs from that of the X-ray Technician I in that employees in this class are responsible for supervising, coordinating, and evaluating x-ray programs in designated public health areas or counties, or x-ray and electrocardiographic operations. Work involves maintaining clinic schedules; taking and developing chest films; performing disease control activities; assisting in training new technicians; and responsibility for the operation of x-ray machines, automatic x-ray film development processors, darkroom equipment, and/or electrocardiograph machines. A technical supervisor provides occasional assistance and instructions regarding unfamiliar problems; however, employees work with considerable independence within the framework of the program. Operations are subject to inspection and review by a technical superior.
